INDIVIDUAL INTELLECTUAL PROPERTY PROFILE OF A MUNICIPALITY

265 MUNICIPALITIES IN THE REPUBLIC OF BULGARIA

IP Profile®

PART OF THE NATIONAL MAP
OF INTELLECTUAL PROPERTY
OF THE REPUBLIC OF BULGARIA

RANK

The rank of each municipality is determined by the value of its intellectual property index (IP Index) for 2024 relative to all municipalities in the country.

IP Index

The Intellectual Property Index is based on 4 industrial property parameters and 14 literary and artistic property parameters per 10,000 population for a specific territory (municipality) and a specific period (2020-2024). The maximum value of the index is 100 units and the minimum is 0, which forms the ranking presented below.

IndP Index

The Industrial Property Index comprises 4 parameters per 10,000 population for a specific territory (municipality) and a specific period (2020-2024): the number of applications for patents, utility models, trade marks and industrial designs. The maximum value of the index is 100 units and the minimum is 0, which forms the ranking presented below.

LAP Index

The Literary and Artistic Property Index comprises 14 parameters per 10,000 population for a specific territory (municipality) and a specific period (2020-2024): libraries, newspapers, books and pamphlets, magazines and bulletins published, cinemas, music ensembles, museums, theatres, performances, recitals and concerts, radio operators, television operators, films produced and chitalishta (community cultural centres). The maximum value of the index is 100 units and the minimum is 0, which forms the ranking presented below.

CRAFT Index

The Crafts Index is based on a single parameter of craft activity, the number of craftspeople entered in the register, per 10,000 population for a specific territory (municipality or district, respectively) as at 2025. The maximum value of the index is 100 units and the minimum is 0, which forms the ranking presented below.

ABOUT THE DATA

The reference period of the data presented in the municipal profiles is indicated after each parameter. For industrial property, the data show the number of applications for protection of the respective subject matter (patents, utility models, trade marks and designs) filed in the year indicated in brackets. For example, “Patent applications (2024)” refers to the applications for the grant of a patent filed in the period 01.01.2024 - 31.12.2024.

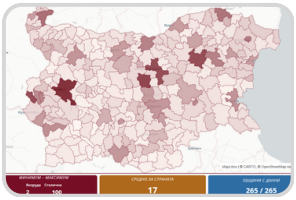

For artistic property, the parameter “Libraries (2025)”, for example, indicates the number of libraries as of the year given in brackets, whereas parameters such as “Newspapers published - circulation (2025)” indicate the total circulation for the respective calendar year.
For crafts, the data show the number of registered craftspeople and the crafts they practise as at the end of 2025.

ISSN:

COMPONENTS OF THE NATIONAL MAP OF INTELLECTUAL PROPERTY

1 INTERACTIVE NATIONAL MAP OF INTELLECTUAL PROPERTY

An online tool that visualises intellectual property activity across the territory of all 265 municipalities and 28 districts.

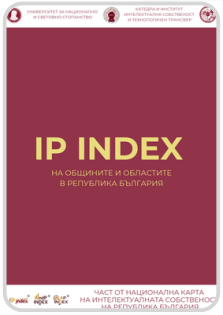

map.iptt-unwe.bg

2 NATIONAL REPORT 2026

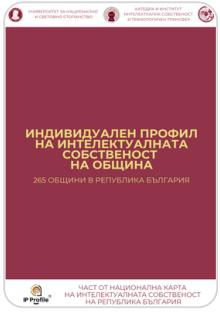

Summarises the results at district and municipal level, identifies the main trends and sets out recommendations for the development of intellectual property in the Republic of Bulgaria.

3 IP INDEX OF MUNICIPALITIES AND DISTRICTS

Contains four indices built on the data: the intellectual property, industrial property, literary and artistic property, and crafts indices.

4 INDIVIDUAL PROFILES OF THE MUNICIPALITIES

Contains four indices built on the data: the intellectual property, industrial property, literary and artistic property, and crafts indices.
